

## Aurora Photography Gallery

### The Beautiful Northern Lights

Because the greatest variety and most loud [natural ELF/VLF radio phenomena](#) are best heard in the auroral-zone of Earth (the locations on the planet where the Northern Lights can be seen overhead on a high percentage of clear nights), I've made a few road-trips into sub-arctic regions of Canada and Alaska.

The following images are just a sample of the glorious Northern Lights displays I witnessed and photographed on four trips northward...and also in the California desert where I reside!

---

### **On a trip to central Saskatchewan, June 2001:**

**Near Cisco, Utah (eastern-central Utah) 18 June 2001 at about 0900 UT:**

**Near Sanders, Montana (central Montana) 20 June 2001 at about 1000 UT:**

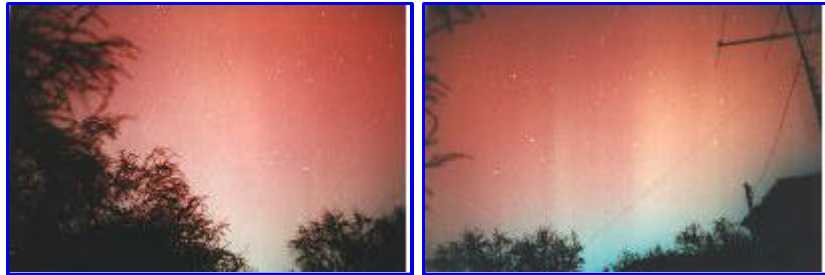

(Once I made it up north into Saskatchewan, the nights were too bright with twilight to see any aurora)

## **Eastern California Desert - Solar Maximum Delight!**

**31 March 2001 - Inyo County, California:**

**Keeler, CA:**

**Santa Rosa Flat next to Death Valley National Park:**

**Santa Rosa Flat 06 November 2001:**

---

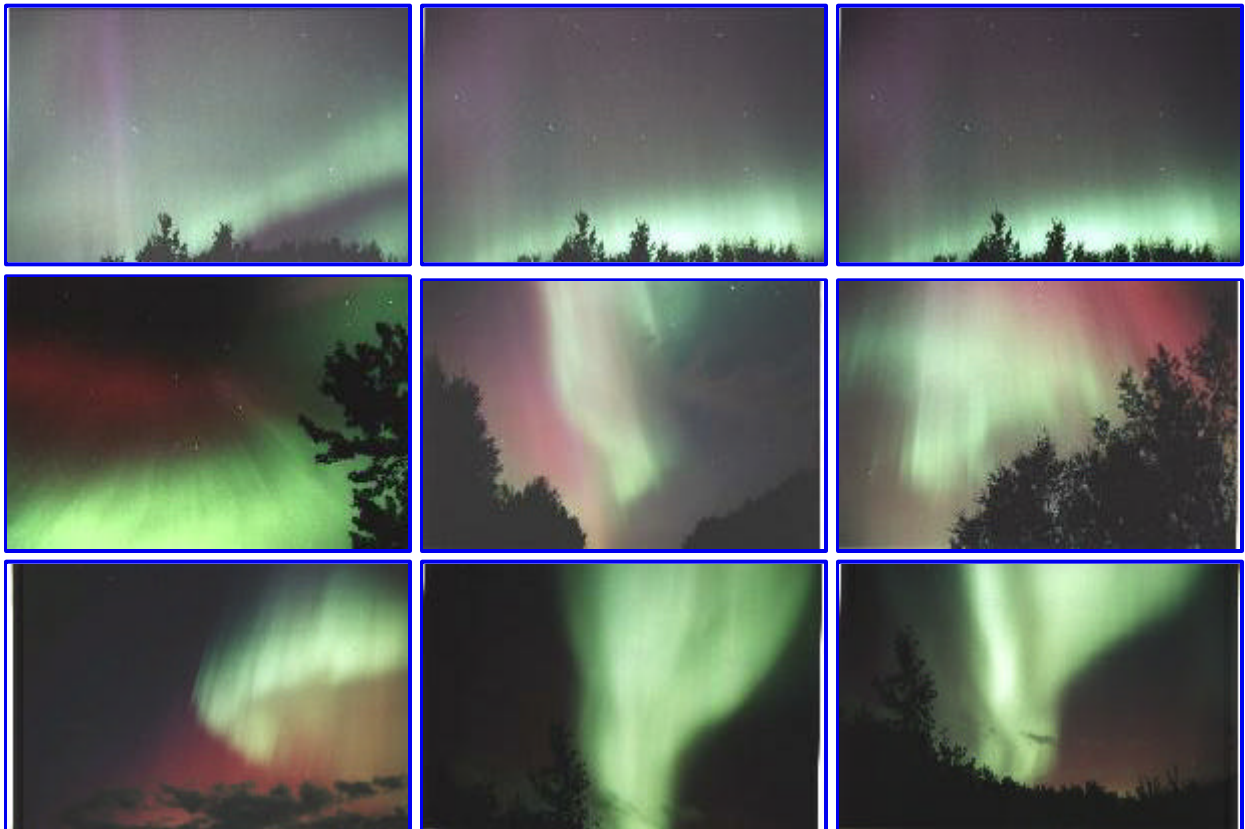

**Northern Alberta, August 07 - 13, 2000:**

**09 August 2000:**

---

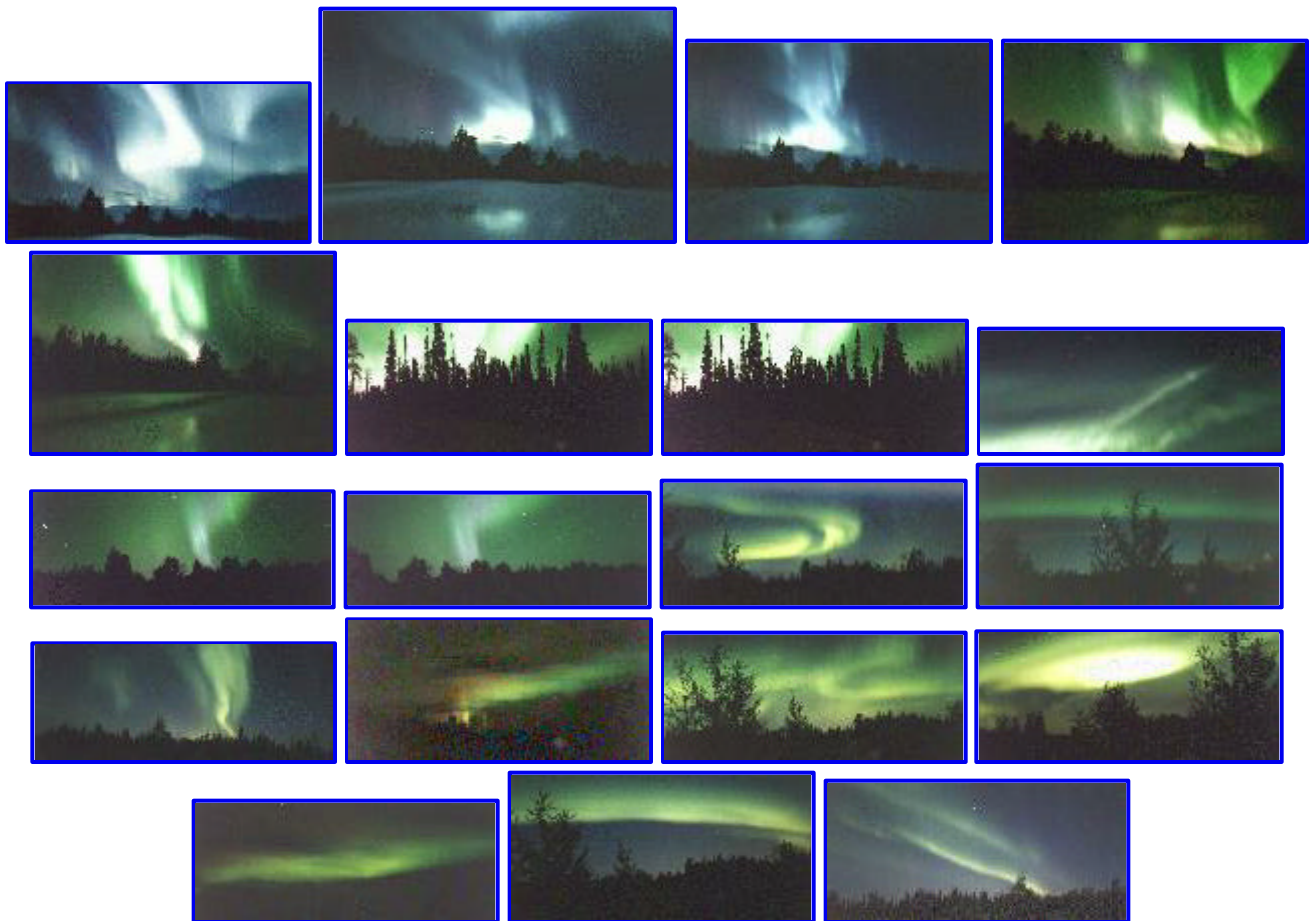

**12 - 13 August 2000:**

---

### Central Manitoba, August 23 - 29, 1996:

---

### Central Alaska, September 7, 1995:
